Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/599,490	Applicant(s) RUSSKE ET AL.	
	Examiner Dennis H. Pedder	Art Unit 3612	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Double Patenting

.1 Applicant is advised that should claim 1 be found allowable, claim 11 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

.2 A convertible closure that attaches is releasable in reverse order.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1-3, 5-7,9, and 11 rejected under 35 U.S.C. 103(a) as being unpatentable over Okada et al. in view of Porter et al. and either Prenger et al. or Kaltz et al

4. Okada et al. have all claimed details less the disclosure for manual top movement and the handle for manually moving the top. Porter et al. teach, prior to the invention of applicant,

Art Unit: 3612

(col. 4, lines 51-54) that motor failure of a convertible top can be overcome via manual movement and convertible top structure with a handle, allowing such manual movement is taught by either of the patents to Prenger et al. or Kaltz et al. in the shape of the front bow, fully graspable for closing.

5. It would have been obvious to one of ordinary skill to provide in Okada et al. manual override of a convertible top motor drive as taught by Porter et al. and a handle shaped front bow as taught by either Prenger et al. or Kaltz et al. in order to move the top manually upon automatic motor failure from a convenient position within the passenger compartment.

6. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Okada et al. in view of Porter et al. and either Prenger et al. or Kaltz et al. as applied to claim 1 above and further in view of Hacker.

7. It would have been obvious to one of ordinary skill to provide in the combination above a release operating element 26 as taught by Hacker in order to control the pre-opening of the roof or conversely to release the latch upon CPU failure.

Response to Arguments

8. Applicant's arguments filed 2/2/2010 have been fully considered but they are not persuasive. The reference to Porter et al. fully teaches the manual movement argued by applicant at a time prior to applicant's invention.
